KLX 250/300 Shift Kit Instruction

The Four Stroke Works shift kit includes a pre-load device and a modified shift star. This allows for a definite and positive shifting.

Installation:

1. Remove 6mm nut that secures the shift-star position arm
2. Remove spring and slip preload device over the end of the spring
3. replace spring and arm, using red lock-tite on 6mm nut.
4. while holding arm down, replace shift star. Make sure dowel is aligned properly.

With all the choices available to you, we thank you for choosing Four Stroke Works for all your motorcycle needs

Thank you

Jerry Leighton
